WEBSITE STRATEGY / DESIGN / DEVELOPMENT

Japan, Beyond the Classroom.

Final website requirements brief for a bespoke educational travel service serving Indian institutions.

THE CORE PROMISE

Your institution's vision. Your students' journey. Every detail thoughtfully planned.

CUSTOM PRIVATE GROUP TRIPS • INDIA TO JAPAN

Prepared as a practical handoff document for brand, content, UX, design and development. The proposed brand name and tagline are working concepts and can be changed.

01 Executive summary

Build a premium, responsive website for an India-based service that plans customized private educational trips to Japan for one institution at a time.

Business model: B2B educational travel planning and coordination. The website should generate qualified institutional enquiries, not sell fixed-date public departures or individual holiday packages.

Primary conversion: Request a Custom Trip Proposal. Every trip is tailored to the institution's learning goals, age group, group size, schedule, practical needs and budget.

Recommended launch platform: WordPress with a lightweight/customized theme for flexible content management. Webflow is a viable alternative for a design-led site with a smaller content operation.

Strategic positioning: Combine practical school-trip planning, rich activity and destination storytelling, and an education-first, trust-led presentation.

Success means an institutional decision-maker can quickly understand what you do, see what a Japan program could include, feel confident about the planning process, and submit an enquiry without needing a finalized itinerary.

Contents

Section	What it covers
02. Brand & messaging	Positioning, audience, core message and calls to action
03. Visual design system	Color palette, typography, photography and UI style
04. Sitemap & page requirements	Core pages and their content purpose
05. Homepage wireframe	Recommended section order and content
06. Programs & itineraries	How to present customized experiences without fixed packages
07. Lead generation	Enquiry form, workflow and conversion tracking
08. Technical requirements	CMS, SEO, analytics, accessibility, privacy and performance
09. India-specific considerations	Institutional needs, dietary needs, documentation and safety
10. Delivery plan & acceptance	Phases, deliverables and launch checklist

02 Brand positioning & messaging

The website should feel like a specialist educational travel partner—not a conventional leisure travel agency.

Working brand concept

Japan, Beyond the Classroom.

Supporting message: *We turn your institution's idea into a complete educational journey to Japan—from planning and documentation support to meaningful learning experiences and on-ground coordination.*

Brand personality

- Trustworthy and responsible
- Education-first and outcome-oriented
- Premium, organized and thoughtful
- Culturally curious and contemporary
- Flexible, collaborative and practical

Primary audiences

Audience	Needs the website should address
Schools	Age-appropriate activities, supervision planning, school visits, cultural learning and parent communication.
Colleges & universities	Academic exposure, STEM and industry themes, campus visits, student development and global perspectives.
Educational organizations / NGOs	Program objectives, group coordination, inclusivity, practical delivery and partner collaboration.
Corporate / other organizations	Industry exposure, leadership, innovation, sustainability and customized group learning.
Institutional travel partners	Clear service scope, coordination model, group logistics and proposal process.

Recommended calls to action

Placement	CTA
Hero primary	Design Your Institution's Trip
Hero secondary	Explore Learning Experiences
Program cards	Customize This Experience
Navigation	Plan a Trip
Final conversion section	Request a Custom Trip Proposal

Avoid “Book Now,” fixed departure messaging and package-first pricing. The conversion should begin with a conversation about the institution's goals.

03 Visual design system

Use a Japanese editorial aesthetic: generous whitespace, premium photography, restrained accents and clear navigation.

Color	Hex	Use
Warm Ivory	#F7F5EF	Main background and editorial sections
Midnight Navy	#172B3A	Headings, navigation, footer and primary text
Japan Vermilion	#D84A3A	Primary CTA, active states and small highlights
Sakura Pink	#E9BFC4	Decorative accents and cultural storytelling
Bamboo Sage	#D9E5DF	Learning cards and supporting section backgrounds
White	#FFFFFF	Cards, form fields and contrast

Typography

- Headings: Manrope or Plus Jakarta Sans, with confident weight and compact line spacing.
- Body text: Inter for readability across long pages and forms.
- Keep decorative Japanese characters optional and sparing; do not rely on them for essential information.

Photography direction

- Use authentic-looking images of student groups, classroom exchange, cultural workshops, robotics and engineering, university settings, and Japanese city environments.
- Prefer wide, cinematic hero photography with room for legible headline text.
- Use consistent color grading and real learning moments over generic planes, hotels or resort imagery.
- Only use licensed, owned or otherwise appropriately authorized images.

UI rules

- Mobile-first layouts with visible CTAs and short, scannable content blocks.
- Rounded cards and restrained borders; avoid excessive shadows and gradients.
- Vermilion buttons with clear hover/focus states and readable contrast.
- Keep animation subtle and optional; respect reduced-motion preferences.
- Use consistent image ratios and descriptive alt text.

04 Sitemap & page requirements

Prioritize six core pages for launch. Add supporting content when real programs, proof and operating details are available.

Page	Purpose and required content	Priority
Homepage	Hero, audiences, learning themes, custom planning process, sample program concepts, safety approach, FAQs and CTA.	Launch
Japan Educational Trips	Destination overview, city options, learning experiences, sample itineraries, inclusions and proposal CTA.	Launch
Programs & Learning Themes	STEM, robotics, culture, language, school exchange, sustainability, industry and global perspectives.	Launch
Sample Itineraries	Day-by-day examples, duration, learning objectives, destination flow and enquiry CTA. Label as illustrative.	Launch
Safety & Planning	Planning responsibilities, supervision model, accommodation, dietary needs, documentation support and emergency process.	Launch
Contact / Plan a Trip	Structured enquiry form, email/phone/WhatsApp and expected next steps.	Launch
About Us	Team, expertise, service philosophy, partners and verifiable credentials.	Next
Experiences / Case Studies	Real completed programs, photographs, testimonials and measurable outcomes—with permission.	Next
FAQs / Resources	Common planning questions, brochures and useful preparation content.	Next
Policies	Privacy, terms, cancellation/refund and other applicable policies.	Launch as required

Reference direction

- Odaduu school-trip page: take inspiration from practical institution-facing trip planning and enquiry orientation.
- StudyTrip homepage and Japan page: combine broad educational travel positioning with a dedicated destination experience page.
- Eduvel: take inspiration from education-led storytelling, cultural immersion and institutional presentation.

Reference sites: odaduu.com/schools · studytrip.com/en/ · studytrip.com/en/japan/ · eduvel.jp. Use them as directional references, not as copy or design assets to reproduce.

05 Homepage wireframe

Recommended section order from the top of the page to the final conversion.

01

Hero

Headline: “Japan, Beyond the Classroom.” Supporting copy explains end-to-end customized planning. Primary CTA: Design Your Institution's Trip. Secondary CTA: Explore Learning Experiences.

02

Who we help

Cards for Schools, Colleges & Universities, Educational Organizations, and Corporate / Other Groups. Each links to relevant program themes.

03

Why Japan?

Four pillars: Culture & Heritage, Science & Technology, Education & Exchange, Global Perspectives.

04

Experiences we can arrange

Clickable cards for school visits, STEM, cultural workshops, language learning, industry visits, sustainability and leadership.

05

Illustrative trip concepts

Examples such as Japan Discovery, STEM & Innovation, and School & Cultural Exchange. Mark durations as examples, not guaranteed products.

06

How the process works

Understand goals → Design itinerary → Coordinate logistics → Prepare participants → Deliver agreed trip plan.

07

Safety, comfort & communication

Explain real arrangements and boundaries for supervision, emergency contacts, dietary requirements, documentation and insurance.

08

Proof & credibility

Use genuine team credentials, partner details, testimonials and case studies only when verified and authorized.

09

FAQs

Cover group size, planning lead time, pricing, flights, meals, visas, supervision, changes and cancellation terms.

10

Final CTA

“Have an idea for a Japan student trip?” CTA: Request a Custom Trip Proposal.

06 Programs & itinerary strategy

Present experiences as flexible building blocks, not as fixed products. Institutions should be able to combine themes and adapt the itinerary.

Theme	Potential experiences	Learning value
Culture & heritage	Tea ceremony, calligraphy, traditional arts, heritage walks	Cultural awareness, observation and reflection
STEM & innovation	Science museums, robotics experiences, technology-focused visits where available	Applied learning, engineering and problem-solving
School / university exchange	Educational institution visits and student interaction, subject to partner confirmation	Cross-cultural communication and education comparison
Language & communication	Introductory Japanese, guided activities and practical communication	Language confidence and intercultural skills
Business & industry	Manufacturing, innovation, sustainability or business visits where available	Industry awareness and real-world context
Sustainability & cities	Public transport, urban planning and environmental learning	Systems thinking and responsible citizenship

Illustrative program concepts

Concept	Example duration	Positioning
Japan Discovery	6 days / 5 nights	Introductory cultural and city-based learning journey
STEM & Innovation	7 days / 6 nights	Technology, science experiences and modern infrastructure
School & Cultural Exchange	8 days / 7 nights	School interaction, culture and guided learning

Important: these durations are examples only. They are not confirmed packages. Final routing, partner visits, activities, availability and pricing must be validated before publication.

Custom proposal should include

- Institution objectives, audience and learning outcomes.
- Proposed route and day-by-day schedule, with alternatives where appropriate.
- What's included and excluded: flights, accommodation, meals, transport, activities, insurance and taxes.
- Estimated cost, assumptions, validity period, payment milestones and cancellation/change terms.
- Partner-dependent items, accessibility/dietary arrangements and operational responsibilities.
- Next steps, decision deadlines and contact details.

07 Lead generation & enquiry workflow

The enquiry form is the primary conversion mechanism. Make it easy to start even if the institution has only an initial idea.

Field	Format / guidance
Organization type	School; college/university; educational organization/NGO; corporate/other; travel partner.
Institution name and city	Text fields; city in India helps plan consultation and departure logistics.
Contact person	Name, official email and phone/WhatsApp; required fields clearly marked.
Group size	Under 15; 15–30; 30–50; 50–100; 100+; undecided. Clarify whether this includes accompanying adults.
Student age group	Under 13; 13–18; 18+; mixed/undecided.
Trip objective	STEM/technology; culture/language; school/university exchange; business/industry; mixed; other.
Duration and travel window	Preferred duration, tentative date range and flexibility.
Budget	Per participant or total group budget; include “Need guidance.” Confirm currency and inclusions during discovery.
Customization stage	Have a full itinerary; have some ideas; need help from scratch.
Special requirements	Dietary needs, accessibility, learning needs, accommodation preferences and other notes.
Consent & privacy	Appropriate privacy notice and consent wording for the data being collected.

After submission

- Show a clear confirmation message and explain when the team expects to respond; publish a response timeframe only if you can meet it.
- Send the team a complete lead notification and store the lead in a CRM or secure lead tracker.
- Assign an owner and record lead status: New → Contacted → Discovery → Proposal → Follow-up → Won / Closed.
- Offer WhatsApp as an alternative, not as the only contact route.
- Track form submissions, successful submissions, phone/WhatsApp clicks, consultation bookings and brochure downloads.

The form preview in this brief is a specification only. Production implementation must connect to a real email, CRM or secure lead-management destination.

08 Technical & content requirements

Area	Requirement	Priority
Responsive UX	Mobile, tablet and desktop layouts; touch-friendly controls; no horizontal overflow.	Must
CMS	Manage pages, programs, itineraries, FAQs, images and SEO fields without developer support.	Must
Forms	Validation, accessible labels, spam protection, secure handling, success state and notifications.	Must
SEO	Descriptive URLs, metadata, heading hierarchy, XML sitemap, robots.txt, canonicals and redirects where needed.	Must
Analytics	GA4 and GTM; track qualified form submissions and key CTA events.	Must
Performance	Responsive/compressed images, limited scripts, caching where supported and Core Web Vitals testing.	Must
Accessibility	Readable contrast, keyboard navigation, visible focus, alt text and useful error messages.	Must
Security & privacy	HTTPS, updates, restricted access, data minimization, privacy notice and appropriate consent.	Must
CRM	Save leads with source, campaign, organization type and status; prevent avoidable duplicate leads.	Recommended
Scheduling	Optional consultation calendar with timezone clarity and confirmation email.	Recommended
Brochure downloads	Downloadable program overview with a clear next step; use consent-aware lead gating only if justified.	Recommended
Online booking	Student accounts, payment collection and participant dashboards are not required for initial launch.	Later

SEO content opportunities

- Japan educational trips for Indian schools
- Customized Japan student trips for colleges and universities
- Japan STEM and technology study tours
- Japanese cultural exchange programs for students
- Educational tour planning to Japan from India

Use search phrases naturally in helpful page content. Do not create thin duplicate pages or claim partnerships, school access or outcomes that cannot be substantiated.

09 India-specific planning considerations

Institutional decision-makers need clarity about the operational details behind the experience. Show what your service does and what requires a third party.

Budget transparency

- Clearly distinguish inclusions and exclusions: international flights, accommodation, local transport, meals, activities, insurance, visa fees, taxes and personal expenses.
- State whether estimates are per participant or for the group and what assumptions affect the final price.
- Explain payment milestones, quotation validity, currency and supplier-price changes.

Student and parent readiness

- Provide an agreed process for parent/guardian consent where minors participate.
- Clarify the institution's responsibilities for student supervision and your own responsibilities for travel coordination.
- Explain communication channels, emergency escalation and participant orientation.

Dietary, accessibility and comfort

- Collect vegetarian, Jain, allergy-related and other dietary needs early; confirm availability with suppliers rather than guaranteeing without confirmation.
- Ask about accessibility and accommodation needs during itinerary design.
- Explain accommodation standards, rooming assumptions, transport arrangements and group movement.

Documentation and safety

- Describe documentation and visa-application support accurately; never promise visa approval.
- Explain insurance options and who purchases/maintains coverage.
- Publish a real emergency process and escalation contacts once the operating model is established.
- Obtain permission before publishing student images, testimonials, institutional logos or case studies.

Trust rule

Do not publish unverified safety statistics, guaranteed partner visits, guaranteed visa outcomes or testimonials that cannot be substantiated. Distinguish direct services from partner-provided services.

10 Delivery plan & acceptance checklist

Launch the smallest credible version first, then expand once the enquiry and delivery process is working.

Phase	Scope	Completion criteria
1. Strategy & content	Confirm brand, audience, service scope, inclusions, claims and page copy.	Approved sitemap, messaging, page content and operational assumptions.
2. UX & visual design	Wireframes, design system, desktop/mobile page designs and component library.	Approved designs for homepage, Japan page, programs, itinerary and enquiry form.
3. Development	CMS, page templates, navigation, responsive components, form and notifications.	Pages render correctly; content can be edited; enquiry data reaches the right destination.
4. SEO & analytics	Metadata, indexability, sitemap, analytics and conversion events.	Tested tracking, valid forms and no critical SEO/configuration errors.
5. QA & launch	Cross-device testing, accessibility checks, privacy/policy review and handover.	No critical defects; form tested end-to-end; backups and admin access documented.

Launch acceptance checklist

- All core pages approved and linked from clear navigation.
- Primary CTA visible on desktop and mobile.
- Enquiry form tested with valid, invalid and incomplete submissions.
- Lead notifications arrive and submitted data is stored securely.
- WhatsApp, email and phone links work.
- Analytics events are verified without duplicate conversion counting.
- Page titles, meta descriptions, canonical URLs and sitemap checked.
- Images are licensed/authorized, optimized and have appropriate alt text.
- Privacy, terms and cancellation information reviewed for the actual service model.
- Mobile performance, keyboard access, form errors and major browser layouts tested.
- Team can update content and has documented lead follow-up steps.

Out of scope for initial launch

- Individual student accounts or parent portals.
- Online payments and installment management.
- Automated visa processing.
- Live flight/hotel booking integrations.
- Complex trip operations software.

FINAL RECOMMENDATION	**Position the business as a bespoke educational travel partner for Indian institutions. Lead with customized planning, learning value, transparent logistics and a clear proposal process—not fixed packages or generic sightseeing.**

Working concept only: “Japan, Beyond the Classroom” is a proposed tagline, not a confirmed business name. Validate naming, domain availability, legal requirements, suppliers and service commitments before launch.
